P-J BASS BLEND
1 VOLUME | 1 TONE | 1 BLEND

This wiring substitutes a blend control in place of the second volume pot.
This gives you a master volume, a blend control, and a master tone.

Solder = location for ground (earth) connections.

Here at Seymour Duncan, we encourage you to use and share these wiring diagrams freely. But, it really hurts our feelings if you use them in commercial use without prior written permission. Switching the wiring of your guitar is a practically free way to get new tones out of your guitar... Now go have fun!
