

*Use the two-cable "ToneStyler DUO"  
model in guitars and basses with  
TWO or more volume controls,  
and only ONE tone control...*

*such as Fender J-Bass,  
Gibson Explorer,  
& similar vol-vol-tone  
models; all Gretsch  
models with a master  
tone knob.*

# Stellartone ToneStyler

with single cable

For Fender P-Bass, Tele, Strat, and  
similar one-volume knob instruments.

For instruments with two tone  
controls: use one or two  
ToneStylers, or a  
ToneStyler DUO  
plus one tone pot.

Solder Directly  
to Pickup Output ⇔⇔

For multiple pickup models: connect one  
ToneStyler to one (or each) pickup; for master volume  
models, connect one to blend pot or pickup selector switch output.

**DO NOT CONNECT TO A VOLUME POT'S OUTPUT!**
